EDUCATION

B.S Computer Science — College of Mary Immaculate, Bulacan

Graduated March 2026

WORK EXPERIENCE

8Con Academy

April 2025 - June 2025 (240 hrs)

Web Developer and Marketing Intern

Meycauayan, Province Of Bulacan, Philippines

- Helped build 8Con East by turning design mockups into working pages using HTML and CSS.
- Worked with the Marketing Team to edit photos, create social media templates, and manage the official social media account by posting updates and keeping the content active.
- Also designed the interface of their enrollment system to make it clearer and easier to use.

THESIS PROJECT

Immaculearn – Collaborative Learning Web Application (React, Node.js, MySQL)

- Led front-end development and UI/UX design for a collaborative learning platform supporting real-time communication, task management, and file sharing for students and instructors.
- Built responsive and user-friendly interfaces using React and TailwindCSS, improving accessibility and user engagement across devices.
- Integrated key features including real-time collaboration, secure authentication, and organized file management, enhancing productivity and academic workflow.

PROJECTS

Minicell

- Designed and developed the user interface for a clothing e-commerce website.
- Improved customer engagement by creating a clean and user-friendly shopping experience.

Communique

- Designed and developed the user interface for a thread-based social media application.
- Focused on creating an intuitive and visually appealing layout for better user interaction.
